Package ***org.eclipse.emf.examples.extlibrary*** contains model interfaces.

Package ***org.eclipse.emf.examples.extlibrary.impl*** contains model implementations.

Package ***org.eclipse.emf.examples.extlibrary.start*** contains UI and model generation.

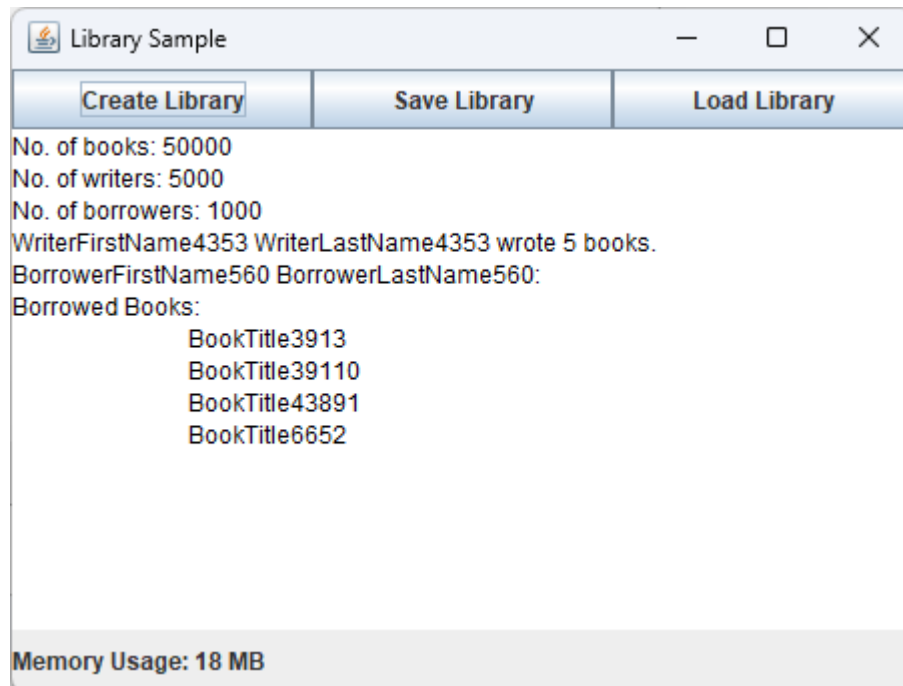

Package ***org.eclipse.emf.examples.extlibrary.util*** contains model generation.

Press ‚Create Library‘ to generate a library with 50k books...

Afterwards, the 'Save Library' button is enabled.

The UI shows some information.

The save and load methods in the `org.eclipse.emf.examples.extlibrary.start.LibraryFactory.java` are empty and must be programmed:
